

# AIRSHOWER EGas700

High-Speed Ring Air Flow

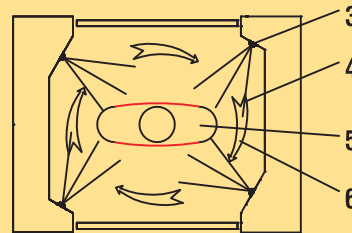

Whole Scope Clean

Narrow Width,  
Covering Smaller Area

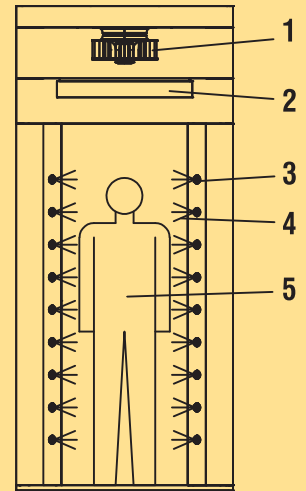

The series of EGHF Air-Shower which is obtained the national patent has its unique design. The surrounding air current will be formed while it is working which makes the surface of the uniform trembled repeatedly in order to clean the surface dust thoroughly. And it can clean the body and goods in highly scope with its particular design.

Control Panel

3. Fixed Nozzle 4. High Velocity Airflow  
5. Body 6. Ring Airflow

1. Blower 2. HEPA Filter  
3. Fixed Nozzle 4. High Velocity Airflow 5. Body

## Standard Features:

- the national patent of ring Air Current Structure (200720005580.9)
- particular surrounding air current removing dust more thoroughly
- particular design of air blowing can clean all over
- Fixed Nozzle all around it to avoid blow
- narrow width, covering smaller area
- both in and out doors interlocking, automatic induction working
- all stainless steel design
- the efficiency of filter is more than 99.99%

## Options:

- using manual control or not
- using sheet steel crust treated by static- electricity spray painting or not
- designing automatic doors or not
- using the function of Air Voice Notice or not
- using double Air or more Air
- choosing the design of collecting-water chassis to adopt some different fields

Type	Description	Outer Size (W x D)	Inside Size (W x D)	Power (watts)	airflow (m/s)
EGAS700-900-1FR	Single	1200x900	900x900	220	>30
EGAS700-1800-2FR	Double	1200x1800	900x1800	440	
EGAS700-2700-3FR	Three	1200x2700	900x2700	660	
EGAS700-3600-4FR	Four	1200x3600	900x3600	880	
EGAS700-1200-1FH	Goods	1800x1200	1300x1200	220
